PROFILE

With 14+ years of experience. I've worked in agencies and in corporate and have a fine balance of both. I've designed for domestic (Indian) and International clients in the USA, UK, Nigeria, and Singapore as well, in most genres of the industry - Pharma, IT, Education, Healthcare, Legal, Financial, and more lighter industries like Entertainment, Fashion, Luxury, and Construction.

In the recent years, I've worked as a freelance designer with design firms, ad agencies, and IT firms, successfully collaborating with their in-house teams to deliver high-end design projects managing tight deadlines and high expectations from agencies and clients.

Using my clean and eclectic sense of design, I have found my core passion in digital & print publishing, and branding. I've also worked on websites, social media design and strategy, and lately I enjoy working on UI/UX design projects collaborating with dev teams.
